

I am a United Airlines flight attendant strongly opposed to the usage of cell phones while in flight. First, how do we know if it is really safe and won't interfere with navigation or aviation equipment??....Secondly, it would make an already tense cabin environment more stressful. Imagine sitting on a plane and the passenger to your left and right are both yelling into their cell phone. Not to mention the person in front and behind you talking on a cell phone. How can you get some peace and quiet??.....Thirdly, I don't think it would be a good idea to give terrorists a chance to communicate with one another. This would further jeopardize safety.....PLEASE DO NOT ALLOW THE USE OF A CELL PHONE ON AIRPLANES ESPECIALLY IN-FLIGHT.....
